Professional Summary

Senior FullStack Developer with **7 Years** of Web Dev experience and **3 years** of professional experience. Expertise in **JavaScript**, **TypeScript, ReactJS, NodeJS, and AWS technologies**. Proven track record in developing high-profile applications and advocating for AWS Serverless solutions.

Experience

Sennoavte │ Senior FullStack Developer
Mar 2022 - Mar 2024

- Developed and maintained applications for high-profile clients, including **Dermalogica**, **Gluu**, **Aera**, **AAAS**, and **True News**.
- Spearheaded the development of a one-click Gluu Server Installation feature, utilizing **AWS** CloudFormation, Lambda, SQS, SNS, and other AWS services.
- Orchestrated the creation of a Security Assessment survey tool to analyse companies' cybersecurity status. (***ReactJS, NodeJS***)
- Managed the design and implementation of the Partnership Portal for reseller acceptance and management. (**NEXT JS**)

Sennoavte │ FullStack Developer
Mar 2021 - Mar 2022

- Led the construction of an employee login and Role-Based Access Control system for Dermalogica, managing both frontend and backend components. (***React, React Query, NodeJS***)
- Implemented authentication and authorisation layers for True News using open-source technologies like Gluu, Kong API Gateway, and WebAuthN.

Forgerock │ Javascript Developer (Through Sennovate)
Feb 2023 - Jul 2023

- Appointed as a JavaScript Developer from Sennovate, responsible for building custom connectors to transfer data from **HRIS, FreshService**, and other applications to **Forgerock Cloud**.
- Developed UI components for various authentication screens.

Developer and Course Creator
2017 - Present

- Created and published online courses related to AWS Serverless, JavaScript, React, and Node.js for "Learn With Shobhan". (**https://courses.learnwithshobhan.com**)
- Founded and managed a self-initiated freelancing venture specialising in Civil engineering applications.
